EDUCATION

University of Ottawa

Bachelor of Applied Science, Mechanical Engineering — Co-op Program

Sep 2025 – Apr 2030 (Expected)

Jean Augustine Secondary School, Brampton

Ontario Secondary School Diploma

Sep 2021 – Jun 2025

EXPERIENCE

Suspension Team Member — Baja SAE

University of Ottawa Baja SAE Team

Sep 2025 – Present

- Machined upper and lower control arm ball joint housings on a lathe from steel stock, then welded components to spec — ensuring correct suspension geometry and structural integrity on a competition vehicle.
- Fabricated structural frame components through MIG and TIG welding, maintaining precise tolerances critical to chassis rigidity and SAE rulebook safety standards.
- Contributed to a full vehicle build that successfully completed competition at Baja SAE New York 2025, one of North America's premier collegiate off-road engineering events.
- Collaborated across a multi-discipline team from fabrication through assembly, interpreting technical drawings to translate design intent into finished components.

Customer Consultant — Part Time

Fehmi Lights

Aug 2022 – Sep 2025

- Delivered personalized client service, built trust, and drove sales through effective communication and product knowledge.

Sales Representative — Part Time

Lighting Era, Brampton

Jun 2021 – Jul 2022

- Delivered personalized client service and drove sales through effective communication and customer engagement.

Co-Founder, Computer Science Club

Jean Augustine Secondary School

Sep 2024 – Jun 2025

- Founded and led a student CS club, fostering a collaborative and inclusive environment; organized a school hackathon, coordinating logistics and mentoring participants.

Flight Corporal

892 Snowy Owl Squadron — Royal Canadian Air Cadets

Sep 2018 – Jun 2020

- Developed leadership, discipline, and teamwork through structured training; early aviation exposure inspired pursuit of a drone pilot licence and PPL.

PROJECTS & AWARDS

XR Chemical Engineering Virtual Lab — 1st Place, uOttawa Design Day

University of Ottawa Faculty of Engineering

Nov 2025

- Co-developed an immersive VR environment in Unity recreating the uOttawa Chemical Engineering Pilot Plant, enabling users to simulate distillation, heat transfer, and equipment operation interactively.
- Awarded 1st place at the University of Ottawa Engineering Design Day, selected from all first-year engineering teams for innovation, technical execution, and real-world applicability.

SKILLS & LANGUAGES

Technical: SolidWorks, AutoCAD, Unity (XR/VR), MIG/TIG Welding, CNC Machining, Lathe, Milling, GD&T

Professional: Leadership, Communication, Problem-Solving, Research & Development

Certifications: Transport Canada Drone Pilot Licence (Advanced) | Aviation PPL in Progress

Languages: English, French, Urdu, Hindi
